# Skills intelligence

## WHAT IS SKILLS INTELLIGENCE?

Available analysis of **aggregated data on skills in relation to labour market trends** and corresponding learning opportunities, which can contribute to guidance and counselling, recruitment processes, provision of education and training, and career paths

## Policy base

Two main **policy documents** define *Europass' role* in providing information on Skills Intelligence:

### EUROPASS DECISION

Europass shall provide, through an online platform, **web-based tools for skills intelligence as produced by relevant Union-level activities and agencies** within their domains of competence.

## Skills Intelligence helps:

### From a Policy Perspective

to **address labour shortages** in Europe, by enabling to assess surpluses and shortages in job demand and supply across EU countries.

### From a User Perspective

to make **informed decisions** about their career and skills development, by providing European citizens with a **clearer picture of skills and occupations' needs** across different EU countries

## SKILLS AGENDA of 2020

To strengthen and disseminate Skills Intelligence, the Commission will **present skills intelligence information tailored to individuals' needs in Europass**. This will assist individuals in their study, training and work choices, and help counsellors and mentors, inter alia in Public Employment Services.

Job & Skill Trends!

## Job and skill Trends

This tool will support you in finding helpful information about the demand of specific occupations and skills across EU countries. You can look for the top occupations in a specific country and for a specific occupation and its most relevant skills.

Occupation **Country**

### Browse by country

Select a country from the dropdown list or click on the map to see which jobs are in high demand across the EU.

Country  
Select ▾

Select or type the name of a country

📍 You recently searched for Italy, France, Belgium

Step one: Select a country from the list  
Step two: You will see the top ten occupations that are in demand for that country  
Step three: You see an interesting occupation in the list? Go to the occupations tab to see if this occupation is in demand in other EU countries

Explore the top occupations per country

Know if your occupation is in demand in the country you are interested to work in

- Possibility to **clear search** field
- **Suggestions** based on recent searches

**Browse by occupation**

Enter an occupation to discover relevant skills and EU countries in which it is in high demand.

Occupation  
Test engineer

Test engineers plan and perform detailed quality tests during various phases of the design process to make sure that the systems are properly installed and function correctly. They analyse the data collected during tests and produce reports. They are also responsible for the safety of the test operations.

**Top 10 Skills**

1. Installing wooden and metal components
2. Conducting academic or market research
3. Technical or academic writing
4. Analysing scientific and medical data
5. Evaluating systems, programmes, equipment and products
6. Gathering information from physical or electronic sources
